There are quite a few engines in se throughout the district lowing, but the horse is doing lost of the work.

The cultivation of alfalfa is go ing to receive a great impetus throughout this district during the present season. Farmers who have already some acres in alfalfa are increasing their acre age, and many farmers who had not tried it out before are getting ground in shape for seeding it. It is now absolutely proved that afalfa can be profitably grown here on irrigated land, and there were numerous fine fields within a radius of ten miles of Strath-more last year. Alfalfa requires more labor at the start in preparing the ground, etc., than some other crops, but one seeding will be all that is necessary for a con-siderable number of years, under favorable circumstances, and when the alfalfa field is plowed up as great yields can be obtained as from virgin soil. The number of livestock in the district is in-creasing so fast that the open range and prairie hay is insuffi-cient to feed them, and the grow-ing of alfalfa provides the rem-

community.

The demand to-morrow all over Canada for Canadian-made goods would change, as if by magic, the present depression into immediate prosperity.

Here, then, is a ready-at-hand, practical, sensible, and profitable way for us, all of us, to make and keep Canada prosperious.

It is practical patriotism to "Made-in-Canada" and it is practical self-Interest as wel. Your money stays in Canada---livens up Cana an trade generally---and so helps to create a prosperity in which you share.

Varieties of Grain for the Prairie Provinces

In Bulletin No. 81, of the regu-lar series issued by the Director of the Dominion Experimental Farms and entitled "Division of Cereals; Summary of Results, 1914," Dr Charles F, Saunders, Dominion Cerealist, recommends the following warieties of grain for the Prairie Provinces;

warieties of gram for the Pealue Provinces; Spring Wheat—Red Fife best in fully areas but Marquis where rain-full is sufficient; for earliness and longer straw, furron and Early Red longer straw, furron and Early Red longer straw, furron and Early Red longer straw, furron and facility in late will find favor for earliness and where the tendency is towards-excessively long straw. In dry districts, where earliness is needed, Pioneer will probably give satisfac-tion.

Pioner will probably give satisfaction.— Banner and Liquory, Dubarter Kighty Day, or the common commercial sort Otolf, if extreme earliness is required, provided the climate is not extra dry.
